One Healthcare Ecochallenge
Harnessing Our Collective Power to Drive Change

Cleveland Clinic, Mayo Clinic, and PeaceHealth have collaborated with Ecochallenge.org to create an exciting engagement initiative for healthcare employees—the One Healthcare Ecochallenge. From April 1st – 30th, we are inviting healthcare organizations to come together as one to make a positive impact on caregiver, community, and environmental health.

What is the One Healthcare Ecochallenge?
During this month-long engagement campaign, participants will use the Ecochallenge platform to select actions to take with the goal of forming healthy and sustainable habits. Participants can choose from a suite of daily and one-time actions that promote well-being, resource stewardship, education, collaboration, and more. These actions are grouped into five categories: At Work, At Home, In Our Communities, Health & Well-Being, and One Healthcare.

By logging progress throughout the challenge, participants will see their individual and team impacts add up on the Ecochallenge site. During our inaugural challenge last year, approximately 2,500 healthcare employees logged more than 35,000 actions! Learn more by viewing our impact summary.

Are there sponsorship opportunities?
We invite you to participate as an official sponsor to make the One Healthcare Ecochallenge even bigger and better. Contributions will help us provide the most up-to-date and engaging content, as well as staff support to make sure everything runs smoothly. Sponsor logos will be displayed on the One Healthcare Ecochallenge portal throughout the duration of the challenge.

Supporter: $2,500   Impact Sponsor: $5,000   Category Sponsor: $10,000*

*In addition to the event landing page, sponsor logos will be displayed on an action category page of choice (first come, first served): At Work, At Home, In Our Communities, Health & Well-Being, or One Healthcare.

How do we join the movement?
The challenge will launch just in time for Earth Month 2024 and is free and open to all healthcare organizations and their employees. Visit onehealthcare.ecochallenge.org to create your team.

We are excited to share our collective impact at the end of the challenge and look forward to working together as One Healthcare to make a positive difference in our workplaces and communities.
